Why PyLadies?

First Meetup
September 5th 2019
@JDC Just Digital People

About PyLadies

PyLadies is an international mentorship group with a focus on helping more women become active participants and leaders in the Python open-source community.

PyLadies also aims at providing a friendly support network for **beginners/intermediate/advanced/users/developers**.

Goals

Time commitment

- Once a month, every first Thursday –> **Next meetup 3rd October 2019, Save The Date!**
- Weekend/weekly workshops/study groups → contact Mila Guerra

Ideal activities

- Lightning talks from local developers, professors, students… → if you want to have a specific presenter, tell us and we can contact him/her for you

  - Python in the wild… → what are your interests?

PyLadies & Men members

It's a Men's world!

PyLadies community has a Code of Conduct: http://www.pyladies.com/CodeOfConduct/

"This does not only extend to members to local PyLadies communities, but to anyone who chooses to become involved in the larger PyLadies community of users, developers and integrators through events or interactions…"

Our end goal is to build a safe space for those genders underrepresented in tech!

BUT…

"…it's beneficial for some men to see large groups of technical women anyway, because it helps unravel the unconscious biases."

(from PyLadies Slack)

"..Right now gender discrimination is a topic mostly consumed by women and discussed most of the time only between women, thus we would like to shift this conversation so that men are also included. Through this we will be able to create the right environment, programs and policies where women in technology can thrive…"
(Women Techmakers, Vienna)

Announcements

- The R-Ladies Brisbane organiser is looking for python users working in neurosciences for running a workshop (October/November), please contact her in the #general PyLadies Australia Slack channel (Paula), or ask me for her contact

- We are planning to run a R-Ladies/PyLadies meetup event in the next months → please contact me for topic EOI

Contacts

- PyLadies Brisbane co-organisers:

Mila

Tzara

Betsy
